### Ballad Of A Young Married Man (Select Global "Hit Prediction") SELECT GLOBAL | TW102 | CD | 9321481036724

The kind of country that The Wildes play is a million miles from the homogenized, super-slick commercial stuff you hear coming out of Nashville (and even Tamworth). They have a far more blues – and – roots take on the genre, which is perhaps why they are able to win over so many fans that otherwise claim to "hate country music". In actual fact The Wildes don't just win them over, instead they tend to whip them into a frenzy of unadulterated whooping and hollering such as you might expect to see and hear in some Pentecostal church in the proverbial 'deep south'.

Ballad of a Young Married man is a song about an adulterous young man shot down by his wife: the mood and subject matter evoke Nick Cave's Murder Ballads. With sand in its boots and blood on its hands, this music strokes your spine and shakes your shoulders. This is thrilling, terrifying stuff.

- **Liam Casey, Drum Media**

"The Wildes cover a wide expanse of American dirt roads and wear their influences proudly on their sleeves, but their interpretation on these styles are uniquely their own" and "[They] carry the DNA of STEVE EARLE, THE WATERBOYS ... TOM WAITS." - **Twang Nation USA**

The Wildes are one of the most refreshing and exciting bands to come onto the Australian country music scene in a long time. - **John Nutting ABC Radio's Saturday Night Country**

## SELECT GLOBAL SPECIAL PROMOTION OFFER NOW EXTENDED TO APRIL JAZZ CHARACTER SERIES

We've already outlined a general history of jazz by strolling down the many highways and byways of its different styles during the first fifty years of its life; now we're going to propose another approach to this music, the most popular and creative of the 20th century, and incidentally, one that's still continuing to develop, though in a different manner. We'll be offering a chronological approach to the life and music of some great jazzmen. There are already several anthologies and compilations in this world to do with jazz and those who are part of it, but we wanted to take a different approach and go one step further if possible. We'll be following our selected artists into every corner of their life, their critical and popular successes, anything unusual or innovative they introduced, all in their order of composition; another "extra" with us will be the sound which will be cleaned and restored. So here goes – jazz to listen to, accept, listen to again, appreciate, think about...For these are the high points of a musical story belonging to the 20th century that's still relevant fifty years later.
